

Benefits of National Institute of Child Health and Human Development (NICHD) Terminology

- * Everyone on the perinatal team speaking the same language when communicating about fetal assessment data.
- * Clear concise terms to minimize variation among care providers.
- * Consistency in medical record documentation of fetal status.
- * Decreased liability exposure should an adverse outcome result in litigation.

Description of the Program

This **intermediate** course focuses on applying essential fetal heart rate monitoring theory and skills in intrapartum practice. *Participants must attend both days.*

Day One

Participants will analyze case studies and use a physiologic-based approach to interpret fetal monitoring data.

Day Two

Participants will attend skill stations offering demonstration, practice and testing in auscultation, Leopold's Maneuvers, insertion and placement of an intrauterine pressure catheter and fetal spiral electrode, interpretation of tracings, identification of nursing intervention, and communication and documentation.

Objectives

To promote integration of knowledge and skills essential to assessment, promotion and evaluation of fetal safety during labor.

This course enables participants to:

- * Analyze fetal heart patterns, uterine activity and their implications for fetal well-being.
- * Discuss indicated clinical interventions and related maternal-fetal physiology.
- * Effectively communicate verbal and written data about patient status.
- * Describe the roles and responsibilities of health care providers in the use of FHM in intrapartum care.
- * Demonstrate the psychomotor skills used in FHM.

Intermediate Fetal Heart Monitoring Course

March 13 & 14, 2012
at North Brunswick

8:00 AM-4:30 PM

2 King Arthur Court, Suite B
North Brunswick, NJ 8902
732-937-5437

Presented by:

Registration

Due to program format, *space is limited*.
Preregistration and payment must be received by March 6, 2012.

Fee: Includes continental breakfast and lunch both days, nursing contact hours, participant packet and a copy of the "*Fetal Heart Monitoring Principles and Practice*" (Fourth Edition) textbook. Participants must read the text prior to the course and bring the text to the workshop. The text will be mailed to participants upon receipt of payment.

No additional materials are necessary to purchase for this course.

CJFHC reserves the right to cancel the program should there be an insufficient number of participants.

Directions & Parking

Directions will be sent with your registration confirmation and text book. Do not park in reserved parking spaces or along the perimeter of the parking lot. Violators will be towed.

For more information, please contact:
Mitchellene E. Swann 732-363-5400 ext. 17
or mswann@cjfhc.org

Continuing Education Credit

Nurses

Participants who attend the full workshop earn 18.00 CNE's awarded by AWHONN and will be available via AWHONN's on line CE/CME system.

AWHONN holds California BRN Provider Number CEP 00580 and Alabama # ABNP0058.

Physicians

Physicians attending this course will receive 15.25 Continuing Medical Education credit for full participation. CME credit is managed by Professional Educations Services Group and will be available via AWHONN's on-line CE/CME system.

Nursing Requirements

The course builds on the knowledge and skills of experienced nurses. It is designed for registered nurses with a minimum of six months clinical nursing experience using fetal heart rate monitoring technology in an intrapartum setting.

LPNs and LVNs may attend this course for educational development purposes. LPNs receive contact hours and may elect to participate in the skills stations as a learning experience.

Successful completion of this course is a prerequisite for participation in the Advanced FHM Course.
